

Abdur Rehman

03077590177 | ar.abdurrehman611@gmail.com | Islamabad

Summary

Full-Stack Software Engineer with experience in designing and developing scalable web applications. Proficient in building intuitive front-end interfaces and robust back-end systems, with expertise in databases like MongoDB and SQL. Passionate about exploring emerging technologies, including Web3 and blockchain, with hands-on experience in smart contract integration for decentralized applications..

Education

Comsats University Islamabad, Abbottabad Campus | Abbottabad,
Bachelor's Degree in Software Engineering | 07/2023

The Peace College, Mansehra | Mansehra
Fsc in pre-engineering | 10/2019

Experience

Petalnex | Mansehra

Full Stack Developer | 09/2025 - Present

- Developed scalable and high-performance web applications using Next.js, React.js, Node.js, and Express.js
- Designed and implemented RESTful APIs and backend services for seamless data flow
- Managed and optimized MongoDB databases, including schema design, indexing, and performance tuning
- Built responsive, user-friendly interfaces with a focus on modern UI/UX standards
- Integrated frontend with backend systems, ensuring smooth communication and data consistency
- Implemented authentication, authorization, and secure data handling practices
- Collaborated with cross-functional teams to deliver complete, production-ready solutions
- Maintained code quality using best practices, modular architecture, and reusable components

TwoCoders | Remote

Full Stack Developer | 10/2024 - 08/2025

- Developed and maintained scalable web applications using modern technologies such as React, Next.js, Node.js, Express, and Nest.js, ensuring high performance and seamless user experiences.
- Designed and implemented Chrome extensions to enhance browser functionality, improving productivity and user engagement.
- Integrated AI capabilities into applications using LangChain.js, enabling advanced natural language processing and intelligent automation features.
- Optimized backend systems for efficiency and scalability, leveraging Node.js, Express and Nest to handle high traffic and complex data processing.
- Developed the backend system for a fitness application as a learning project, utilizing Node.js with Express.js and TypeScript. Created structured APIs for workout data processing, implemented authentication protocols, and optimized database operations using MongoDB. Developed with future scalability in mind to support potential mobile app integration via React Native.

Octaloop Technologies | Islamabad

Full Stack Developer | 08/2023 - 09/2024

- Develop and maintain web applications using front-end technologies such as HTML, CSS, JavaScript, and frameworks like Reactjs or Nextjs.
- Build and manage server-side logic, database interactions, and APIs using back-end technologies such as Node.js, Express.
- Design and implement database schemas, manage data storage solutions using SQL and NoSQL databases.
- Implement server-side logic in Node.js to process and handle AI model requests and responses efficiently.
- Develop and integrate Web3 functionalities to enable decentralized applications (dApps) using Ethereum and other blockchain technologies.
- Utilize version control systems such as Git for code management and collaboration.

Projects

MISTER AI

AI-powered platform offering features like resume generation, blog creation, image processing, PDF simplification, and quizzes. Built using Node.js, Express.js, Next.js, and MongoDB with scalable architecture and AI integrations.

LIBERSWAP

Developed a Web3 dApp using React.js enabling wallet connectivity, crypto transactions, and NFT minting with Web3.js and smart contracts for secure, decentralized interactions.

Minotaura

An AI-powered business intelligence platform that enables users to effortlessly access, analyze, and visualize data from files and databases using natural language queries. Built with NestJS for backend architecture, LangChain.js for advanced AI workflows, and OpenAI for NLP capabilities, the platform transforms complex data into actionable insights with seamless conversational interactions. It empowers businesses to make data-driven decisions faster, eliminating the need for technical expertise in querying and reporting.

YT For Work

A Chrome extension, filters videos on youtube page against the user field to a selected preiod of time

Home Workout App

Built scalable backend APIs using Node.js, Express.js, and TypeScript with MongoDB for workout data management and authentication.

ODRS

Full-stack application built with Next.js, Node.js, Express.js, MongoDB, and MUI for managing and resolving disputes digitally.

Rahtaak

Developed a rental marketplace platform using Next.js, Node.js, Express.js, and MongoDB connecting landlords and tenants.

Petalnex, Human Resource Management System (HRMS)

Developed a Human Resource Management System with modules including User Management, Attendance, Leaves, Tasks, Meetings, Projects, Departments, and Notifications using MERN stack.

N8N Automation Solutions

Developed automation workflows including AI chatbot for lead generation, email automation, and RAG-based applications using n8n and AI integrations.

Skills

- **Backend:** NodeJS, ExpressJS, NestJS
- **Frontend:** ReactJS, NextJS
- **Databases:** MongoDB, Firebase, SQL
- **Cloud Storage:** AWS, Azure
- **Tools:** Vs Code, Git, Github, Postman, Insomnia
- **Chrome App:** Chrome extensions
- **Automation:** N8N
