

ABDUR REHMAN

Software Engineer | Full Stack Developer

0307-7590177 | ar.abdurrehman611@gmail.com | Islamabad, Pakistan | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full-Stack Developer with 3+ years of experience building and maintaining scalable, high-performance web applications using React.js, Next.js, Node.js, and TypeScript. Skilled in designing and integrating RESTful APIs and third-party services, working with MongoDB for data management, and delivering production-grade features end-to-end — from database and API design through deployment and production support. Experienced in troubleshooting and optimizing application performance and reliability, collaborating closely with developers and QA across the development lifecycle, and following coding standards and security best practices. Also brings hands-on experience integrating AI/LLM-powered features (RAG pipelines, vector search) into full-stack products.

CORE SKILLS

Frontend: React.js, Next.js, Redux, Responsive UI/UX, MUI, React Native

Backend & APIs: Node.js, Express.js, Nest.js, TypeScript, RESTful API Design, Third-Party Integrations, Authentication & Secure Data Handling

Databases & Data Layer: MongoDB, SQL, Firebase, Pinecone (Vector Search)

Cloud, DevOps & Tools: AWS, Azure, Git, GitHub, Postman, Insomnia, Docker (familiar)

AI / LLM & Automation: LangChain.js, OpenAI API, Groq API, RAG, N8N Workflow Automation

Web3: Ethereum, Web3.js, Smart Contracts, dApps

PROFESSIONAL EXPERIENCE

Full Stack Developer — Petalnex, Mansehra

09/2025 – Present

- Develop and maintain full-stack features across frontend (Next.js/React) and backend (Node.js/Express, TypeScript) with MongoDB, focused on performance, scalability, and reliability for production applications.
- Design and integrate RESTful APIs and third-party services; implement authentication and secure data handling for enterprise workflows.
- Build an AI-powered RAG application for document search and Q&A, integrating vector-based retrieval with LLM responses.
- Contribute to Petalnex HRMS (attendance, leave, task, and employee management modules), collaborating with developers and QA throughout the development lifecycle, including code reviews, testing, debugging, and production support.

Full Stack Developer — TwoCoders, Remote

10/2024 – 08/2025

- Built and optimized backend APIs with Node.js, Express.js, and TypeScript, including a fitness app backend with MongoDB schema design and query optimization.
- Integrated LangChain.js for AI-driven automation and natural language processing features.
- Developed a React Native mobile app with a Groq-model-powered backend for AI-driven features.
- Built a Chrome extension to enhance browser functionality and user productivity, working closely with stakeholders to define requirements.

Full Stack Developer — Octaloop Technologies, Islamabad

08/2023 – 09/2024

- Built responsive, scalable web applications and APIs using React.js, Next.js, Node.js, and Express.
- Designed SQL/NoSQL database schemas and handled AI model request processing for backend services.
- Developed Web3 dApp features using Ethereum and smart contracts.

KEY PROJECTS

ODR Document Manager — Enterprise Document Parser & RAG Pipeline

Full-stack platform for uploading documents (PDFs, Word files), auto-extracting text/tables via AI parsers, and converting verified content into vector embeddings for a chat interface that answers questions directly from uploaded files.

Tech: React/Next.js, Material-UI, Node.js/Express, MongoDB, OpenAI/Mistral APIs, Pinecone/PostgreSQL (Vector Search)

Minotaura — AI Business Intelligence Platform

AI-powered platform allowing users to access, analyze, and visualize data from files and databases using natural language queries.

Tech: Nest.js, TypeScript, LangChain.js, OpenAI API, RAG

Mister AI

AI-powered platform offering resume generation, blog creation, image processing, PDF simplification, and quiz features, built on a scalable backend architecture with AI integrations.

Tech: Node.js, Express.js, Next.js, MongoDB, OpenAI API

Petalnex HRMS

Human Resource Management System with modules for user management, attendance, leaves, tasks, meetings, projects, departments, and notifications.

Tech: React.js, Next.js, Node.js, Express.js, MongoDB (MERN Stack)

N8N Automation Solutions

Automation workflows including an AI chatbot for lead generation, email automation, and RAG-based applications.

Tech: n8n, LangChain.js, AI Integrations

Liberswap

Web3 dApp enabling wallet connectivity, crypto transactions, and NFT minting through smart contracts for secure, decentralized interactions.

Tech: React.js, Web3.js, Smart Contracts, Ethereum

ODRS — Dispute Resolution Platform

Full-stack application for digitally managing and resolving disputes.

Tech: Next.js, Node.js, Express.js, MongoDB, MUI

Rahtaak — Rental Marketplace

Rental marketplace platform connecting landlords and tenants seamlessly.

Tech: Next.js, Node.js, Express.js, MongoDB

YT For Work

Chrome extension that filters YouTube videos by user-defined topic and time period to improve focus and productivity.

Tech: JavaScript, Chrome Extension APIs

EDUCATION

Bachelor's Degree in Software Engineering — 07/2023

COMSATS University Islamabad, Abbottabad Campus — Abbottabad

FSc in Pre-Engineering — 10/2019

The Peace College, Mansehra — Mansehra
